Genshin Impact Yelan Build Guide: Best Weapons, Artifacts, and Team

⊕ UPDATED JUN 9, 2022

Yelan is a 5-star Hydro Bow character who is first appeared in the initial Genshin Impact banner in the 2.7 update. This guide to the best Genshin Impact Yelan build will explain the best Yelan comp, weapons, and artifact sets, including a Yelan F2P guide. While you can build Yelan as a DPS character, she excels in a sub-DPS role, applying Hydro in a wide area and buffing the entire party's attack.

Genshin Impact Yelan Sub-DPS Build

The most important aspect of Yelan's kit is her **Elemental Burst**, **Depth-Clarion Dice**. This creates an "Exquisite Throw" dice that remains on-field when Yelan swaps out, and deals Hydro damage every time the active character uses a Normal Attack. This effect can occur once a second, and the damage is based on Yelan's Max HP. It's by far the biggest source of damage available to Yelan.

Yelan's Depth-Clarion Dice lasts for 15 seconds and is on a 18 second cooldown, with 70 energy cost.

> Yelan's Elemental Recharge requirements are very demanding, so supporting this is the main focus of the best Yelan build.

Additionally, Yelan's ascension passive, **Adapt with Ease**, increases the active character's damage every second while Exquisite Throw is up. The buff begins as a 1% damage bonus and increases by 3.5% every second up to a maximum of 50%. This passive talent is therefore immensely valuable.

If you're not able to get your hands on Aqua Simulacra, the Favonius Warbow is also a good choice - and best of all, it's a F2P weapon. It can also give her lots of ER if you can't get it

If you don't need the ER from Favonius Warbow, and you don't want to wish on the upcoming Weapon Banner, Elegy for the End or Sacrificial Bow are both good choices.

Yelan F2P Build

The best F2P weapon for Yelan is the Favonius Warbow, which can be acquired through completing the Prologue Archon Quests. If you really don't need the energy recharge or don't want to use FW, you could try using Slingshot, or Fading Twilight, the upcoming 2.7 event weapon.

As for artifacts, you can use whatever you have available that gives Yelan more Energy Recharge, Crit Damage/Crit Rate, and HP/HP%.
